

# SAFETY DATA SHEET

## 1. Identification

**Product identifier** Oatey Liquilock™

**Other means of identification**

**Product code** 1797E

**Synonyms** Part Numbers: 31416, 31417, 31419

**Recommended use** Solidify water for toilet removal.

**Recommended restrictions** None known.

**Manufacturer/Importer/Supplier/Distributor information**

**Company Name** Oatey Inc.

**Address** 4700 West 160th Street  
Cleveland, OH 44135

**Telephone** 216-267-7100

**E-mail** info@oatey.com

**Transport Emergency** Chemtrec 1-800-424-9300 (Outside the US 1-703-527-3887)

**Emergency First Aid** 1-877-740-5015

**Contact person** MSDS Coordinator

## 2. Hazard(s) identification

**Physical hazards** Not Classified.

**Health hazards** Serious eye damage/eye irritation Cat 2

**OSHA defined hazards** Not Classified

**Label elements**

**Signal word** Warning!

**Hazard statement** Causes serious eye irritation.

**Precautionary statement**

**Prevention** Wear eye or face protection. Wash hands thoroughly after handling.

**Response** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

**Storage** Not applicable.

**Disposal** Not applicable.

**Hazard(s) not otherwise classified (HNOC)** None known.

## 3. Composition/information on ingredients

### Mixtures

| Chemical name       | CAS number | %   |
|---------------------|------------|-----|
| Sodium Polyacrylate | 9003-04-7  | 100 |

\*Designates that a specific chemical identity and or percentage of composition has been withheld as a trade secret.

## 4. First-aid measures

**Inhalation** Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If

unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

**Skin contact**

Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.

**Eye contact**

**Ingestion**

Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

**Most important symptoms/effects, acute and delayed**

Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure. Causes skin irritation. May cause an allergic skin reaction. Causes serious eye irritation. Irritating to mouth, throat and stomach.

**Indication of immediate medical attention and special treatment Needed**

In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

**General information**

None

**5. Fire-fighting measures**

**Suitable extinguishing media**

Use dry chemical powder.

**Unsuitable extinguishing media**

Do not use water jet.

**Specific hazards arising from the chemical**

Fine dust clouds may form explosive mixtures with air.

**Special protective equipment and precautions for firefighters**

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

**Fire-fighting equipment/instructions**

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

**Specific methods**

None

**General fire hazards**

None

**6. Accidental release measures**

**Personal precautions, protective equipment and emergency procedures**

If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel".

**Methods and materials for containment and cleaning up**

Large Spills: Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Small Spills: Move containers from spill area. Avoid dust generation. Using a vacuum with HEPA filter will reduce dust dispersal. Place spilled material in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.

**Environmental precautions**

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

**7. Handling and storage**

**Precautions for safe handling**

Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. Do not store above the following temperature: 35°C (95°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

**Conditions for safe storage, including any incompatibilities**

**8. Exposure controls/personal protection**

**Occupational exposure limits**

**US. ACGIH Threshold Limit Values**

| Components                     | Type | Value |
|--------------------------------|------|-------|
| No Exposure limit value known. |      |       |

**Biological limit values**

No Biological limits.

**Appropriate engineering controls**

Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

**Individual protection measures, such as personal protective equipment**

**Eye/face protection**

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

**Skin protection**

**Hand**

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

**Other**

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Respiratory protection**

Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

**Thermal hazards**

None.

**General hygiene considerations**

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

**9. Physical and chemical properties**

**Appearance**

|   |                   |
|---|-------------------|
| <b>Physical state</b>                               | Solid.            |
| <b>Form</b>   | Powder            |
| <b>Color</b>  | Translucent/White |
| <b>Odor</b>   | Acetic Acid       |
| <b>Odor threshold</b>                               | Not available.    |
| <b>pH</b>   | Not Applicable    |
| <b>Melting point/freezing point</b>                 | Not available.    |
| <b>Initial boiling point and boiling range</b>      | Not determined    |
| <b>Flash point</b>                                  | Not Applicable    |
| <b>Upper/lower flammability or explosive limits</b> |                   |
| <b>Flammability limit – lower (%)</b>               | Not Available     |
| <b>Flammability limit – upper (%)</b>               | Not Available     |

|  |   |
|--|---|
| <b>Explosive limit - lower (%)</b>             | Not Available   |
| <b>Explosive limit - upper (%)</b>             | Not Available   |
| <b>Vapor pressure</b>                          | Not Available   |
| <b>Vapor density</b>                           | Not Available   |
| <b>Relative density</b>                        | 1.35  |
| <b>Solubility(ies)</b>                         | Insoluble in the following materials: cold water and hot water. |
| <b>Solubility (water)</b>                      | Not applicable  |
| <b>Partition coefficient (n-octanol/water)</b> | Not Available   |
| <b>Auto-ignition temperature</b>               | Not Available   |
| <b>Decomposition temperature</b>               | Not Available   |
| <b>Viscosity</b>                               | Not Available   |
| <b>Other information</b>                       |   |
| <b>VOC (Weight %)</b>                          | 0 % by weight   |

## 10. Stability and reactivity

|  |   |
|--|---|
| <b>Reactivity</b>                        | No specific test data related to reactivity available for this product or its ingredients.  |
| <b>Chemical stability</b>                | The product is stable.  |
| <b>Possibility of hazardous reaction</b> | Under normal conditions of storage and use, hazardous reactions will not occur.   |
| <b>Conditions to avoid</b>               | Moisture-sensitive material. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. Prevent dust accumulation. |
| <b>Incompatible materials</b>            | Reactive or incompatible with the following materials: oxidizing materials, other acids.  |
| <b>Hazardous decomposition products</b>  | Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

## 11. Toxicological information

### Information on likely routes of exposure

|                     |  |
|---------------------|--|
| <b>Inhalation</b>   | None expected                            |
| <b>Skin contact</b> | None expected                            |
| <b>Eye contact</b>  | Causes serious eye irritation.           |
| <b>Ingestion</b>    | Irritating to mouth, throat and stomach. |

**Symptoms related to the physical, chemical and toxicological characteristics** Irritation, pain or redness

### Information on likely routes of exposure

#### Acute Toxicity

| Components                       | Species | Results     |
|----------------------------------|---------|-------------|
| Sodium Polyacrylate<br>LD50 Oral | Rat     | >8250 mg/kg |

|  |  |
|--|--|
| <b>Skin corrosion/irritation</b>         | Prolonged skin contact may cause temporary irritation    |
| <b>Serious eye damage/eye irritation</b> | Direct contact in the eye may cause temporary irritation |
| <b>Respiratory or skin sensitization</b> |  |
| <b>Respiratory sensitization</b>         | Not considered a respiratory irritant                    |
| <b>Skin sensitization</b>                | This product is not expected to cause skin irritation.   |
| <b>Germ cell mutagenicity</b>            | No specific data   |
| <b>Carcinogenicity</b>                   | No known significant effects or critical hazards.        |
| <b>Reproductive toxicity</b>             | No known significant effects or critical hazards.        |
| <b>Specific target organ toxicity</b>    |  |
| <b>Single exposure</b>                   | Not Classified.  |
| <b>Repeated exposure</b>                 | Not Classified.  |
| <b>Aspiration Hazard</b>                 | Not an aspiration hazard.                                |
| <b>Chronic effects</b>                   | Not Classified.  |
| <b>Further information</b>               | Not Classified.  |

## 12. Ecological information

|                               |   |
|-------------------------------|---|
| Ecotoxicity                   | No Specific Data.                                 |
| Persistence and degradability | No Specific Data.                                 |
| Bio accumulative potential    |   |
| Mobility in soil              | Not available                                     |
| Other adverse effects         | No known significant effects or critical hazards. |

## 13. Disposal considerations

### Disposal instructions

|                                       |  |
|---------------------------------------|--|
| Local disposal regulations            | Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.                 |
| Hazardous waste code                  | Not available  |
| Waste from residues / unused products | Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |
| Contaminated packaging                | Waste packaging should be recycled.  |

## 14. Transportation information

|      |               |
|------|---------------|
| DOT  | Not Regulated |
| IATA | Not Regulated |
| IMDG | Not Regulated |

## 15. Regulatory information

### U.S. Federal regulations

#### SARA 302/304

#### Composition/information on ingredients

No products were found.

SARA 304 RQ Not applicable.

#### SARA 311/312

Classification Immediate (acute) health hazard

#### Sara 313

SARA 313 notifications must not be detached from the SDS and any copying and redistribution of the SDS shall include copying and redistribution of the notice attached to copies of the SDS subsequently redistributed.

### International regulations

| Country(s) or region        | Inventory Name                      | On inventory list (yes/no)* |
|-----------------------------|-------------------------------------|-----------------------------|
| Canada                      | Domestic Substance List (DSL)       | Yes                         |
| United States & Puerto Rico | Toxic Substances Control Act (TSCA) | Yes                         |

## 16. Other information, including date of preparation or last revision

Issue Date 29-May-2015

Revision Date -

Version # 01

HMIS Rating Health: 1  
Flammability: 0  
Physical Hazards: 0

**Disclaimer** Oatey cannot anticipate all conditions under which this information and its product, or the products of other manufacturers in combination with its product, may be used. It is the user's responsibility to ensure safe conditions for handling, storage and disposal of the product, and to assume liability for loss, injury, damage or expense due to improper use. The information in the sheet was written based on the best knowledge and experience currently available.
